

At Wilmington College, Hands-on living and learning means we are committed to helping you define a unique vision for your career and life from your first semester on campus! Making connections between the work you are doing in your classes to career opportunities beyond the classroom, we strive to connect you in personalized ways with the people, organizations, skills, and opportunities to make your unique vision a reality. Career advising, resume writing, internships and networking opportunities are some of the ways the Career Services Office is here to help you!

RESOURCES

ID170 Professional Development Seminar

This 2-credit hour foundational course is designed for first-year students and may be taken during the second 8week abbreviated session in the fall. We'll cover your unique personality and interests, alignment with the right major, practice up on the soft skills employers are looking for, create resumes and portfolios to showcase your talents, dive into career exploration, learn how to execute a successful job search, and set strategies for lifelong professional growth.

Personalized Advising

From personality and skills assessments to resume writing and job searches, and graduate school applications, we offer advice tailored to your background, education, and goals. Appointments are offered in person or virtually.

FOCUS 2

A comprehensive career planning platform providing work interest, values, personality, and skills assessments to help guide you in making the most of your time here. Linking to Wilmington College majors and Bureau of Labor Statistics career field growth projections through 2034, FOCUS II can help you plan for a fulfilling professional future you.

Vmock

This AI-powered career acceleration platform, a Wilmington College partner, offers tools designed to help students improve their resumes, LinkedIn profiles, and interview skills. Using AI and data analytics from across the web, users can score, revise, and improve their career documents.

Internships

In close collaboration with your professors and employers, we help guide you through the internship search and completion process to ensure you are getting the right hands-on experiences you need.

On Campus Student Employment

The Career Services Office can help you find work study jobs on campus and in the community that complement your academic program and provide valuable professional experience on and off campus.

Handshake

All students automatically get access to our online career platform, where employers from around the region, across the country, and across the globe post open jobs and internship opportunities. You can register for career fairs, open interviews, and more on Handshake.

Career, Graduate School, and Internship Fairs

The College hosts at least one large fair each year, where approximately fifty employers and graduate schools show up ready to talk about open positions and programs. Some offer on-the-spot interviews.

Networking Events

Our office is continually meeting with local and regional employers to identify opportunities for students. Faculty and staff are well-connected and routinely host a variety of activities with professional partners throughout the academic year.
